Hello, I'm Jamison

I'm a graphic design enthusiast based in Springville, Utah, and I've always enjoyed creating and working on visual projects. When I'm not working, I like getting outside and playing a round of disc golf. I'm also a dad to four sons, so life stays pretty active and keeps me on my toes.

I've spent over 12 years building websites and web applications from the ground up. I'm comfortable working on the front end and have some back-end experience as well. For the past five years, I've been doing end-to-end graphics production for a Pepsi bottling company, taking projects from concept all the way through to final production.

At this point, I'm ready for a change and excited about the chance to bring my experience and creativity to your team.

EXPERIENCE

GRAPHIC PRODUCTION SPECIALIST (BANNER ROOM)

Admiral Beverage Corporation | Springville, UT MAY 2021 - NOW

I manage the creation and production of point-of-sale (POS) materials for both local and national convenience stores, including window coverings, menus, and table tents for restaurants. I also design and produce in-store displays for major grocery retailers and large-format banners for industry events and food shows.

In addition to design and production work, I oversee various administrative responsibilities, including ordering materials, preparing invoices for reimbursement, and creating internal marketing assets such as office flyers, company business cards, and employee recognition materials.

MERCHANDISER

Admiral Beverage Corporation | Springville, UT JUNE 2017 - MAY 2021

I worked as a Retail Merchandiser for a Pepsi bottling company, where I was responsible for stocking and organizing products in stores to make sure everything looked clean, full, and easy for customers to find. I built and maintained displays, set up promotional materials, and made sure products were placed according to company standards.

The role involved working closely with store managers, keeping track of inventory, and making sure shelves were consistently stocked. It was a fast-paced job that required attention to detail, good time management, and the ability to stay organized while handling multiple stores and priorities.

WEB DEVELOPER

Steven Hales Creative | Provo, UT MAY 2014 - SEP 2016

Worked as a contract web developer, building and maintaining custom websites for a variety of clients. Handled front-end development, implemented responsive designs, and assisted with updates and improvements to existing sites.
